# Exceptional Quality Roofing and Siding

## Extend the life of your roofing and siding....

At Westman Steel Industries, we produce Galvalume Plus™ and Prepainted Galvalume™ sheets that have the longest life of any sheeting available. All of our Prepainted sheets have a high quality AZM150 Galvalume substrate that produces superior results when compared to Z275 (G90) and Z180 (G60) Galvanized substrates.

"Be sure of what you are getting..... There is a difference".

## Count On Westman Steel Industries for superior strength

Westman Steel Industries manufactures steel that is up to 60 percent stronger than other sheets on the market today. Our production line-up includes Grade 80 material or high tensile, pound for pound the strongest steel used in our industry ! This is an 80,000 pound per square inch minimum for Grade 80, providing superior strength and longevity of the Westman sheet.

## Choose steel with colour that lasts .....

Our sheets begin with a high quality AZM150 Galvalume substrate. They then have a factory applied, baked-on high quality paint system applied that has been proven in North America and carries a 40 year limited warranty. The result? You get a high quality colour product that will look great for years to come.
